C. G. 342 (Guria, Mingrelia, part of Imeretia) of wood; in the Imeretian mountains (Racha) of wattle; in Kakhetia all types occur. In eastern and southern Georgia there is also found the so-called "crown-shaped" roof (gvirgvini), which consists of beams over which other beams are placed diagonally, in successive layers narrowing upwards, so that a cupola is formed. Light enters through the spaces between the beams.

C. G. 361 In Kartlia the houses are irregularly grouped into villages, without enclosures and without streets. In the western subtropical region and in Kakhetia the farms are surrounded by fences; in Kakhetia they are situated farther apart amidst the vineyards. Besides the living

C. G. 343 quarters, the farms have stables, hen-houses, barns and granaries--the latter made of wattle and raised from the ground on poles. There is usually a hut with a cover of ferns for newly-wed couples, a well, etc. There is also a baking-

C. G. [354] oven consisting of a cylinder of wattle coated with clay; after heating the oven with charcoal, the dough is placed inside on the wall, after which the oven is closed with a wooden lid and

C. G. 342 cloths. In wine-growing regions there is a wine cellar with a wine press, and large earthenware wine containers, sunk into the ground.

The Svan house is built of rough stones; the ground plan is rectangular. It usually has two stories. The ground floor contains a store-room which at the same time serves as wine cellar, and the winter-quarters for humans and
